

# Lend A Helping Hand

## 2020-21 COVID-19 Wish List | Annunciation Catholic School

Need:	Cost:	Description:
1. MacBookAir Laptops for Teachers	\$10,000 (\$1,000 per Laptop)	We are committed to providing our teachers with the technology to help enhance their teaching. In 2014 we were able to gift our teachers with MacBook Airls. Now, six years later, they need replacing. Many are nearing the end of their lifespan, unable to handle remote learning demands, and need replacement.
2. Webcams	\$1,170 (\$90 per Webcam)	Hybrid learning is possible with the right technology. In the last few years, webcams have become so advance; at times, it feels that you are present in the actual classroom. Should we revert to remote learning, webcams would allow our teachers to provide better rigorous and joyful lessons for all of our students., even from a distance.
3. New Smartboards for Classrooms	\$50,000 (\$5,000 per Board)	We were one of the first Catholic schools to install Smartboards back in 2010, but these devices are now ten years old. Many are nearing the end of their lifespan, unable to handle remote learning demands, and need to be replaced.
4. Online Science Platform	Researching Prices	Our current situation has made it difficult for our teachers to provide our students with hands-on science experiments. We are committed to keeping our children safe and have prohibited the sharing of materials. Having an online science platform will allow our students to partake in science experiments virtually.
5. iPads for Teachers	\$5,200 (\$400 per Board)	We are committed to providing our teachers with the technology to help enhance their teaching. iPads will allow our teachers to share their screens with students and record their lessons should we switch to a hybrid model.
6. Chromebook Carts	\$1,140 (\$380 per Cart)	With our Chromebook program, we need to store the devices safely. Currently, our teachers are using valuable classroom space to store the student's devices. Chromebook carts will both keep our devices charged and safe.
7. Document Cameras	\$1,000 (\$100 per Doc Camera)	Our elementary teachers like to share work with their students using the document camera. The document camera allows teachers to share documents via the Smartboard with their students, allowing for more hands-on learning.
8. EL Education Partnership	\$22,000 per year	We are one of three Catholic EL schools in the nation, and our EL partnership is a huge reason for our tremendous success that has set us apart. Help us cover this cost!
9. Clorox Wipes & Lysol	\$1,000	Keeping our school clean is one of the top priorities. Currently, our Clorox Wipes and Lysol supplies are beginning to dwindle.
10. Security Camera for Building	Researching Prices	Our building security is in need of an upgrade. A new security system will allow our front office administrators a better picture of who is entering our building.
